## Legend

### Acid Free

Paper industry term often tied to longevity.

### Hybrid

2 coating system using resin intercoat to absorb the inks and protect dye from air fade with a microporous topcoat to wick inks away from the surface and reduce dry time.

### Dye/Pigment

Dye typically used for indoor applications and are more vibrant. Pigment-based inks are slightly less vibrant but are more water and fade resistant.

### RSS

Removable side-stripe for use with printers that read the media using an optical sensor such as HP printers

### WorW/OSS

Clear films that are available with or without a side-stripe depending on what printer is being used

### OD

Outdoor media specifically coated for use with pigmented inks for outdoor signage applications

### PA

Permanent adhesive

### Blockout

Blocks out light

### PSA

Pressure Sensitive Adhesive

### Flame Spread Class

Used to describe the surface burning characteristics of textiles and vinyls. Measures how far and how fast flame spreads.
